The *Journal of Software and Systems Modeling* (SoSyM) invites original, high-quality submissions for its theme issue on “Performance Modeling and Engineering of Software and Systems”. The submissions should have a clear focus on the development and application of modeling languages and techniques related to:

- Performance methods in software development

- Performance measurement and experimental analysis
- Benchmarks (workloads, scenarios, and implementations)
- Run-time performance and capacity management
- Performance in cloud, virtualized, and multi-core systems
- Performance and Power
- Performance modeling and evaluation in other domains
- All other topics related to performance

- 
- Papers must be written in a scientifically rigorous manner with adequate references to related work.
  - Submitted papers must not be simultaneously submitted in an extended form or in a shortened form to other journals or conferences. It is however possible to submit extended versions of previously published work if less than 75% of the content already appeared in a non-journal publication, or less than 40% in a journal publication. Please see the [SoSyM Policy Statement on Plagiarism](#) for further conditions.
  - Submitted papers do not need to adhere to a particular format or page limit, but should be prepared using font “Times New Roman” with a font size no smaller than 11 pt, and with 1.5 line spacing. Please consult the [SoSyM author information for submitting papers](#).
  - Each paper will be reviewed by at least three reviewers.
